EDUCATION

GOVERNMENT ENGINEERING COLLEGE, RAJKOT (GTU) (B.E.) in Electronics and Communication / CGPA: 7.8	2021 - 2025
M.G.M SARVAJANIK VIDYALAYA, Daman (Class XII) Gujarat Board, SCIENCE (P.C.M) / Aggregate: 73%	2020 - 2021
Divya Jyoti English Higher Secondary School, Daman (Class X) Gujarat Board / Aggregate: 80%	2018 - 2019

EXPERIENCE

Techreale Associate Software Developer	Jan'2025 – May'2025
- Worked in a professional environment to build production-ready front-end components using React.js, JavaScript, and Material-UI (MUI). - Contributed to the CareDAC project, focusing on implementing form validation, UI responsiveness, and real-world use case flows. Collaborated with a team in an Agile setup, version control, and task delegation.	
Robokart Robotics and Embedded System Intern	June'2024 - Aug'2024
Completed an internship in IoT and embedded systems, developed projects using Arduino UNO, ESP8266 and sensors, programming microcontroller systems, and demonstrating IoT device integration to students and guiding them through real-time project development as a part of a GUJCOST initiative.	

PROJECTS

Care-Dac using React Js

- Developed a web healthcare platform using React.js to streamline patient-doctor interactions and medical record management.
- Ensured design consistency and usability by adhering to Material-UI standards and customizing reusable components to match project requirements.
- Built 20+ React components including signup, login, needsCare, Services and usable Component too.
- Implemented usage of React Router for seamless navigation for user while authenticating.

myNotes

- Built a secure note-taking web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with full user authentication and CRUD functionality.
- Implemented JWT-based login and signup flow, with bcrypt hashing and salt to securely store user passwords without saving plain-text data in the database.
- Enabled users to add, view, and manage notes with title, description, all displayed with UI.
- Followed modular architecture with React components, RESTful API integration, and protected routes to enhance usability and security.

URL Shortener using Node.js and MongoDB

- Built a full-stack URL shortener service using Express.js, Node.js, MongoDB, and Mongoose.
- Generated unique short IDs using the 'nanoid' library to ensure collision-resistant mappings.
- Designed clean API routes to accept a long URL and return a shortened one with proper redirection logic.

InTech-Tech News

- Developed InTech, a tech news web using React.js and the News API, enabling users to browse the latest technology articles through a clean, responsive UI.
- Integrated infinite scrolling with dynamic API calls for seamless content loading and enhanced user experience.
- Designed article cards to display headlines, summaries, and images, with "Read More" links redirecting users to the original source.
- Used Axios for API communication and Bootstrap for consistent styling and layout responsiveness.

TECHNICAL SKILLS

Skills: MERN Stack (MongoDB, Express.js, React.js, Node.js) | HTML5 | CSS | JavaScript | C++ | Python | GIT | OOPS | Bootstrap | (Material UI) |
