

DHRUV SHARMA

dssharma.cse@gmail.com | +91-9426817224 | [LINKEDIN](#)

Dedicated & motivated Computer Science Engineer with a profound passion for both **Engineering**, and **Management** student with a focus on continuous learning, Bachelor's degree at Chandigarh University, offering a solid foundation in **software engineering**.

Education

Chandigarh University, India • B.E CSE CGPA: 8.28/10	2021 - 2025
Swaminarayan English Medium School, India • HSC (Class XII), Aggregate: 91.2%	2020 - 2021
ST. Thomas English Medium School, India • SSC (Class X), Aggregate: 83.3%	2018 - 2019

Skills

C++ | Python | AI&ML | DBMS | SQL | IOT

Interpersonal Skills

Team work, Communication skills, Problem solving, Leadership skills, Presentation Skills

Projects

PATENT - FORTIFIED SHIELD: A COMPREHENSIVE SAFETY SYSTEM AGAINST ASSAULTS AND ROBBERIES

Application No.202411006574

- It highlights existing challenges, including heterogeneity, scalability, and power constraints, and their repercussions on user trust and IoT's susceptibility to **security threats**.

RESEARCH PAPER – Disease Prediction Using Classification Algorithm

DOI: <https://doi.org/10.22214/ijraset.2023.55194>

- Analysis & comparing the performance of four common classification **algorithms** for disease prediction: Decision Tree, Random Forest, Naïve Bayes, and K-Nearest Neighbors (KNN). Obtained an average accuracy of roughly **94%**.
- Contributes to the field of disease prediction and can assist **healthcare** practitioners in selecting the most suitable algorithm for accurate predictions, leading to improved patient outcomes and resource allocation.

Tomato Rev – Disease, Pest Monitoring Solution with Mobile App

Innovative WebApp

- Designed the mobile app solution to **connect** farmers directly to the **consumers**, addressing the need for transparency, trust in the food supply chain, and even facilitating a direct link to the bank for easy access to agricultural loans.

RESEARCH PAPER IEEE - Optimizing Continuous Integration and Continuous Deployment Pipelines for Enhanced Interactive Streaming Experiences

DOI: <https://doi.org/10.1109/ICPC2T63847.2025.10958670>

- It deals with the design of Continuous Integration/Continuous Deployment pipelines with a specialty in interactive streaming applications for their implementation and optimization. For addressing problems regarding real-time content delivery, interactivity by users, and system scalability, the modern practice of continuous integration/continuous deployment.

Academic and Extracurricular Achievements

- Secured **top 2%** Gold Elite in Internet of Things (IoT) course from NPTEL.
- **Amazon Web Services** Cloud Architect Foundational Badge!
- Class Representative (**CR**) for 2 years (2023-2025).
- **Top 3** teams for Tomato Grand Challenge 2023.
- **Deloitte Australia Virtual Job Simulation on Data Analytics via Forage**.
- **Representative** of the DACA Gujarat State in University

Courses

Internet of Things (IoT) || Cloud Computing || Blockchain Basics || Data Analytics Basics
