EDUCATION

- **GOVERNMENT ENGINEERING COLLEGE, RAJKOT (GTU)** 2021 - 2025
(B.E.) in Electronics and Communication, Currently in Fourth Year | CGPA: 7.8
- **M.G.M SARVAJANIK VIDYALAYA, Daman** 2020 - 2021
(Class XII) Gujarat Board, SCIENCE (P.C.M) | Aggregate: 73%
- **Divya Jyoti English Higher Secondary School, Daman** 2018 - 2019
(Class X) Gujarat Board | Aggregate: 80%

EXPERIENCE

- **Techreale** Jan'2025 - Apr'2025
Associate Software Developer
 - Worked in a professional environment to build production-ready front-end components using React.js, JavaScript, and Material-UI (MUI).
 - Contributed to the CareDAC project, focusing on implementing form validation, UI responsiveness, and real-world use case flows. Collaborated with a team in an Agile setup, version control, and task delegation.
- **Robokart** June'2024 - Aug'2024
Robotics and Embedded System Intern
 - Completed an internship in IoT and embedded systems, developing projects using Arduino Uno and sensors, programming embedded systems, and providing robotics training to students as part of a GUJCOST initiative.

PROJECTS

- **Care-Dac using React Js**
 - Developed a responsive healthcare platform using React.js to streamline patient-doctor interactions and medical record management.
 - Implemented secure authentication workflows and intuitive UI components aligned with modern design principles.
 - Implemented data augmentation techniques to improve model generalization.
 - Utilized React Router for seamless navigation and Redux for centralized state management across the application.
 - Collaborated in an Agile environment, delivering continuous improvements based on stakeholder feedback.
- **Guesser Game using Python**
 - Engineered an interactive word-guessing game in Python featuring a graphical interface for enhanced user experience.
 - Developed an interactive word-guessing game using Python and the Pygame library, enhancing user engagement through a dynamic graphical interface.
 - Designed minimalistic interaction logic and includes attempts left for user for too.
- **Facial Recognition Attendance System**
 - Utilized Python to develop a Facial Recognition Attendance System with automated CSV data storage.
 - Efficiently tracks attendance by identifying individuals, ensuring accuracy and automating manual processes.
 - Integrated CSV data storage for seamless record-keeping and easy monitoring.
- **E-Commerce Website Clone**
 - Developed a fully responsive and interactive e-commerce website using HTML, CSS, and JavaScript, mimicking core functionalities of Amazon.
 - Designed product cards, navigation bar, cart, and category filters with CSS transitions and Flex/Grid layouts.
 - Implemented shopping cart logic using JavaScript including add/remove items, subtotal calculation, and dynamic updates.
 - Ensured cross-browser compatibility and mobile responsiveness with media queries and modular CSS.

TECHNICAL SKILLS

Skills: React Js | JavaScript | C++ | Python | GIT | SQL | OOPS | Node.js | MUI (Material UI) | Communication
