

BRIEF SUMMARY

I am a final-year Computer Science student skilled in MERN stack development with experience in building AI-powered and data-driven web applications. I have worked on projects like deepfake detection systems, AI resume analyzers, and analytics dashboards, combining AI, NLP, and Data Analytics to provide actionable insights. I am also proficient in software testing, cloud integration, and real-time features, and I aim to create scalable, intelligent, and impactful solutions.

KEY EXPERTISE

- HTML
- python
- java
- Microsoft Excel
- MySQL
- Node.js
- Github
- CSS
- Analytical Skills
- Problem Solving
- SDLC
- Communication Skills
- Quality Assurance
- Test Management
- Technical Recruitment
- Testing
- Automation
- Functional Testing
- Verification
- power bi
- NumPy
- Pandas

EDUCATION

Parul University B.Tech. - CSE - PIET CGPA: 6.48 / 10	2022 - 2026
mg colloge, Chopda 12 th MSBSHSE Percentage: 74.50 / 100	2022
pvm, Chopda 10 th MSBSHSE Percentage: 79.89 / 100	2020

PROFESSIONAL EXPERIENCE

Parul Institute of Engineering and Technology IT / Computers - Software CSE Lead Data Analyst Key Skills: Data Cleaning & Preprocessing , Exploratory Data Analysis Data Visualization Statistical Analysis SQL & Database Handling Problem-solving using data Critical Thinking Report Writing & Presentation Team Collaboration Data Analytics Internship – CODTECH IT Solutions (Dec 2024 – Jan 2025) Worked on data collection, cleaning, and exploratory data analysis (EDA) to identify patterns and insights. Built visualizations using Python (Pandas, NumPy, Matplotlib, Seaborn) and SQL, and prepared reports to support decision-making.	25 Dec, 2024 - 25 Jan, 2025
Parul Institute of Engineering and Technology IT / Computers - Software CSE Lead Data Analyst Key Skills: Project Understanding Data Cleaning & Modeling Data Visualization Data Storytelling Client Presentation Data Analytics & Visualization Job Simulation – Forage (Nov 2024) Completed a practical simulation covering project scoping, data cleaning, and modeling. Built interactive visualizations and applied data storytelling techniques to deliver insights, culminating in a client-style presentation that demonstrated business impact.	05 Sep, 2024 - 27 Sep, 2024

INTERNSHIPS

codetech info IT / Computers - Software Lead Data Analyst Key Skills: Data Visualization Project Understanding Client Presentation Data Storytelling Data Cleaning & Modeling Data Analytics Internship – CODTECH IT Solutions (Dec 2024 – Jan 2025) Worked on data collection, cleaning, and exploratory data analysis (EDA) to identify patterns and insights. Built visualizations using Python (Pandas, NumPy, Matplotlib, Seaborn) and SQL, and prepared reports to support decision-making.	25 Dec, 2024 - 25 Jan, 2025

PROJECTS

deepfake

05 Sep, 2024 - 10 Sep, 2025

Mentor: ami | Team Size: 4

Key Skills:

Frontend (React + UI)

Backend (Node.js + API)

Database (MongoDB)

AI / Machine Learning

Data Processing & Analytics

DevOps & Deployment

Project Link: <https://github.com/232004shinde/DeepFake.git>

PrismaCheck – AI Deepfake Detection is a web-based platform designed to detect manipulated or synthetic media (images, videos, and audio) using advanced deep learning models. The system follows a transparent, step-by-step pipeline that includes secure upload, preprocessing, feature analysis, model inference, and explainability reporting.

Users can securely upload media, which is processed through frame extraction, face tracking, and voice isolation. The AI engine, built using an ensemble of CNN and Transformer models, analyzes spatial, temporal, and audio biometrics such as eye-blink cadence, lip-sync drift, and spectral artifacts. The system then generates a confidence score with thresholds (Green <40%, Amber 40–70%, Red >70%) to classify the likelihood of manipulation.

To ensure trust and transparency, PrismaCheck provides an explainability report, highlighting key signals, heatmaps, and frame segments that influenced the AI's decision. The platform is built with the MERN stack (MongoDB, Express.js, React, Node.js) for scalability, with Python-based AI models integrated into the backend for inference.

NextHire

02 Jul, 2025 - 03 Sep, 2025

Mentor: priyanka | Team Size: 1

Key Skills:

Frontend (React + Vite or CRA)

Backend (Node + Express)

Database (MongoDB + Mongoose)

AI / Extra Features

Cloud & DevOps Skills

System Design Skills

Soft Skills

Project Link: <https://github.com/232004shinde/NextHiree.git>

The AI-Powered Job Portal is a full-stack web application built on the MERN (MongoDB, Express, React, Node.js) stack, integrated with Artificial Intelligence (AI) for resume analysis and job recommendations.

The system bridges the gap between job seekers and recruiters by providing smart job-matching capabilities, automated resume parsing, and skill-gap identification.

Unlike traditional job portals, this project leverages Natural Language Processing (NLP) to analyze resumes, extract key skills, and match them with job requirements. It also helps candidates improve their employability by suggesting missing skills and training areas.

PERSONAL INTERESTS / HOBBIES

- reading books and cooking , Dancing

IMs

- Other - https://www.linkedin.com/in/priyanka-sukdev-shinde-0085842a8?utm_source=share&utm_campaign=share_via&utm_content=profile&utm_medium=android_app

PERSONAL DETAILS

Gender: Female

Marital Status: Single

Current Address: chopda- MH, paruluniversity vadodara, Chopda, Maharashtra, India - 425107

Emails: 2203031050622@paruluniversity.ac.in , priyankashinde232004@gmail.com

Date of Birth: 23 Jul, 2004

Known Languages: Marathi, hindi, English

Phone Numbers: +91-9420389797, +91-9209146645
