👤 PROFILE

Customer-focused and analytical professional with hands-on experience in customer service, business analysis, and team leadership. Currently interning as a Business Analyst at 1Rivet, where I have developed a deep understanding of project workflows, stakeholder management, and process optimization. Known for elevating customer satisfaction, resolving complex issues efficiently, and driving continuous improvement. Eager to leverage my interpersonal skills, analytical mindset, and business acumen to deliver outstanding customer experiences as a Customer Support Executive.

📁 PROFESSIONAL EXPERIENCE

Jan 2025 – May 2025
Valsad, India

1Rivet

Business Analyst Intern

- Collaborate with cross-functional teams to gather and document business requirements, ensuring clear communication between stakeholders and technical teams.
- Analyzed project workflows, mapped business processes, and identified areas for operational improvement.
- Assisted in preparing project documentation, user stories, and reports to support project delivery and decision-making.
- Developed a strong understanding of the Business Analyst's role in project lifecycles, including stakeholder engagement, requirement validation, and project tracking.
- Supported project coordinators in monitoring milestones and ensuring timely delivery of project objectives.

Oct 2023 – Oct 2024
Valsad, India

IndusInd Bank

Rural Banking Officer (RBO)

- Elevated customer satisfaction by 20% through personalized service and effective problem resolution.
- Consistently achieved sales targets by promoting banking products and building strong client relationships.
- Managed customer inquiries and resolved issues, contributing to improved client retention and loyalty.

Nov 2022 – Aug 2023
Valsad, India

Food Adda Valsad

Manager

- Led a team of 5+ staff, fostering a collaborative culture and significantly improving service efficiency.
- Implemented proactive customer service strategies, resulting in a 25% increase in satisfaction scores and a 30% improvement in retention rates.
- Handled customer feedback and resolved complaints, ensuring a high-quality guest experience.

Mar 2022 – Jul 2022
Valsad, India

- Concept Solution**
Civil Engineer
- Directed the fabrication and installation of sign boards, ensuring precise construction and timely installation.
 - Executed CNC sheet cutting operations with 100% accuracy, adhering to strict client specifications.

Nov 2021 – Mar 2022
Valsad, India

- Sahaj Reality Homes**
Civil Site Engineer
- Performed thorough site inspections to ensure strict compliance with floor plans and structural specifications, maintaining high standards of construction quality.
 - Managed daily material records and optimized inventory flow to facilitate efficient material handling and streamline construction operations.

 PROJECTS

Mar 2025 – May 2025

- LoanIQ**
The project involved working on the LoanIQ platform, a commercial loan servicing and syndication system used by financial institutions to manage complex loan transactions. The primary goal was to streamline and automate the lifecycle of syndicated and bilateral loans—from origination and servicing to trading and settlement.

Mar 2025 – May 2025

- Hotel Management System**
The Hotel Management System aims to streamline hotel operations by leveraging Microsoft Dynamics 365 and Power Platform technologies. The system will enable efficient management of reservations, customer records, payments, and housekeeping services through a centralized database (Dataverse) and role-based access control.

Apr 2024 – May 2024

- Healthcare Analytics Project**
Tools Used:- Tableau
- Analyzed patient data by categorizing blood pressure, BMI distribution, and creating a heat map of health factors by age group.
 - Developed an interactive dashboard and story, providing clear health trends and supporting data-driven decision-making for enhanced patient care.

May 2024 – Jun 2024

- Anomaly Detection Capstone Project** 
- Tools Used:- Linear Regression, Python, Machine Learning, NLP
- Developed a predictive model to identify anomalies in machine performance data, utilizing machine learning algorithms and visualizations.
 - Enabled proactive maintenance, reduced downtime, and improved operational efficiency.
