Percentage - 75%

April 2020 - March 2021

Nani Daman, Daman

Skills

Programming Languages

Javascript | Python | Java | SQL | C

Technologies

Next.js | React.js | MongoDB | Git | Redis | Tailwind | Postman

Notable Projects

Finvest

Full-Stack Investment Simulation Platform

Tech Stack: Next.js (TypeScript), Tailwind, Supabase, Razorpay

- Developed a Groww-inspired platform where users invest virtual money via real-money payments using Razorpay integration.
- Built a dynamic dashboard with portfolio tracking, stock transactions, and real-time return analytics.
- Implemented a leaderboard system to rank users based on returns, promoting engagement through gamification.
- Designed a responsive, modern UI with Tailwind and optimized performance using server-side rendering (Next.js).

Triofin

Financial Planning Tool

Tech Stack: React.js, Tailwind CSS, Chart.js

- Built a clean, user-friendly financial planning tool that generates 40-year projections based on monthly salary input.
- Visualized savings, expenses, and investment growth using dynamic charts powered by Chart.js.
- Designed a structured projection system: yearly insights for the first 12 years, then decade-wise forecasts up to 40 years.
- Developed with a minimalist, responsive UI using React and Tailwind CSS for fast and accessible user experience.
