WORK EXPERIENCE

Initfusion Pvt. Ltd – Ahmedabad, Gujarat

Laravel Trainee

Jan 2025 – July 2025

- Gained foundational knowledge in PHP and its frameworks, including Laravel and CodeIgniter.
- Acquired hands-on experience with MySQL database management.
- Contributed to the development of new features and translated UI designs into fully functional, responsive user interfaces.
- Integrated RESTful APIs to enable seamless communication between frontend and backend systems.

PROJECTS

Tours & Travels Exploration

Technologies: Django, HTML, CSS, SQLite

- Developed a web-based platform allowing users to browse and book travel packages to various destinations.
- User can search their favorite places to visit, they can see attractive spots at that particular place, hotels to stay, cafes nearby.
- Designed and integrated an admin panel to manage bookings, add or update location details, and monitor user activity.

Jobspot | Job Consulting Application

Technologies: Android(Java), Firebase

- Developed a mobile application enabling recruiters to post job openings with detailed role specifications. User friendly interface for job seekers to apply, search and filter for job opportunities based on preferences and skill.
- Real-time notifications to alert job seekers about new job postings.
- Integrated seamless communication channels for direct interaction between recruiters and applicants, streamlining the hiring process.

Blood Bank

Technologies: PHP, HTML, CSS, MySQL

- Developed a platform to display real-time availability of donated blood across all blood types.
- User can register for blood donation, seeker can submit requests for specific blood and quality.
- Built an admin panel with secure authentication to manage, approve, or reject blood donation requests.
- Search feature for donors and seekers to easily find relevant blood type based on location and availability.
