COMPUTER SKILLS

LAMP, XAMPP, WAMP, Visual studio code, Dreamviewer, Macromedia, MS Office, Window Xp, 7,8,10 Ubuntu, Filezilla.

PROJECTS

Laravel + Vue.js

1. Quizify (Product recommendation shopify app)

Quizify is a web-powered quiz builder that allows e-commerce stores to deliver personalized product recommendations to their customers. Often, customers leave the website without a purchase because they cannot settle on the right product. Online shoppers need guidance in finding what they want, just like in real shops. With Quizify, you can ask questions, analyze their responses, and recommend the right products for them. Understand customers' needs and create higher ROI marketing campaigns.

2. Follow up chat – Proof Manager (Shopify app)

Follow up Chat - Proof Manager is your one-stop solution to all the above problems related to customer and proof management. We provide you with a real-time interface to engage with the user to collect information, upload order proofs, enable version control for all the order files and give real-time order updates to the customer from your dashboard. Our app provides end-to-end management of your custom orders right from approval to the final delivery without having to send out cold emails ever.

3. Online database management

The Online Database Management System using Laravel aims to provide a robust and user-friendly platform for efficiently managing and manipulating data through a web-based interface. Leveraging the Laravel framework, the system ensures high performance, scalability, and security for effective data management.

4. Clothing carbon credit

With clothing carbon credit you can empower your customers to take climate action in a fun and easy way. A small widget is added to your shopping cart. Your customers can then choose to make their orders carbon neutral, by funding climate positive projects that are endorsed by the UN and have a Gold Standard certificate. You collect the carbon offset donations from your customers, and we collect that exact amount from you at the end of your billing cycle.

5. Iconic sections

Explore a vast collection of no-code theme sections that allow you to effortlessly combine and customize. Craft eye-catching landing pages, sales pages, and product promotions guaranteed to captivate your audience. Our design packages feature a diverse range of elements, including video backgrounds, promotions, countdown timers, featured collections, parallax effects, custom font uploads, and more, ensuring a seamless and visually striking design experience

6. Custom web-pixel

Custom web-pixel enables you to track any user event and page visits. Activate tracking pixels and optimize your conversion ads or create heatmaps of your store.

Wordpress/Bootstrap/Shopify websites

Proficient in creating custom WordPress themes tailored to meet client requirements. Extensive experience in utilizing WordPress plugins for enhanced functionality and feature integration. Proven track record in developing responsive and visually appealing websites for optimal user experience.

Also demonstrated expertise in building sleek and modern websites using the Bootstrap framework.

Skilled in implementing responsive design principles to ensure seamless performance across devices. Experience in integrating Bootstrap components and styling for a polished and user-friendly interface. Strong focus on mobile-first design practices to enhance usability on Smartphone's and tablets.
