Good knowledge of **Eloquent ORM**, **REST APIs**, **authentication**, and **queues**. Experienced with **AWS** and **CI/CD** pipelines. Always eager to learn new technologies and work in a team environment.

Experience

Yudiz Solutions Limited

Jan 2023 – Present

Web Developer

Ahmedabad, Gujarat

- Specialized in backend development and also worked on frontend tasks at a top web and mobile app development company.
- Acquired proficiency in new technologies and methodologies to meet project requirements effectively.

Technical Skills

Languages: Javascript, PHP

Technologies: Laravel, Node.js, jQuery, Bootstrap

Databases: Relational (MySQL)

DevOps: AWS (S3, EC2)

Projects

Fidali

- Fidali is an Airbnb-inspired property rental platform with three distinct panels: User, Host, and Admin.
- Implemented core features such as property management, booking system, user authentication and review system.
- Developed a chat module enabling real-time communication between users and hosts, implemented for both API and web platforms.
- Designed and built the Host Panel to allow property owners to list, manage, and track their properties efficiently.
- Created an Admin Panel for platform oversight, including user management, property approvals, and analytics.

Sports Event Management and Booking App

- A platform for managing sports events where users and companies can book or create events, with robust authorization for role-specific actions.
- Developed chat modules for user-to-user, user-to-company, and support chat with admins.
- Added features to join events, follow/unfollow creators, and manage personal preferences.
- Included Blog Management for publishing and sharing sports-related content.
- Designed an Admin Panel for event, ground, and promo code management, along with user approvals and analytics.
- Added Ground Management for users and admins to list grounds with details like pitches and availability.

GigPig – Event Booking Mobile App

- GigPig is a dual-role mobile app (User & Artist) for discovering and creating music gigs.
- Includes user registration, profile setup, and role-based navigation.
- Features include event listing, filtering, saving events, and venue details.
- Notifications are sent to artists for their gigs and to users for upcoming saved events.
- Developed an admin panel to manage users, artists, gigs, genres, and CMS pages.

Rush – Sports Booking Website

- Rush is a sports management platform that allows users to book sports grounds.
- Implemented an Admin modules to manage events, branches, and courts, including enable/disable controls.
- Integrated AWS SNS service to send notifications on booking confirmations and cancellations.

Education

Agricultural Information Technology
Bachelor of Technology (CGPA: 7.94 / 10.00)
