PROFILE

Experienced Mobile Application Developer with 4 years in the IT and services industry. Specialized in Android native development and cross-platform technologies like Flutter. Proficient in Android components, RESTful API integration, AES-128 CBC encryption/decryption, Room DB, BLE-based communication and app deployment on the Google Play Store. Strong in team collaboration, secure data handling and end-to-end project execution.

EDUCATION

B.E. in Computer Engineering, Gujarat Technological University 2022 – 2025
CGPA: 8.0

Diploma in Computer Engineering, Gujarat Technological University 2017 – 2020
Percentage: 86.00%

SKILLS

- Android, Core Java
- Flutter, Dart
- Room DB, Firebase
- BLE Development
- RESTful APIs
- Git, GitHub
- Play Store Deployment
- Version Control

PROFESSIONAL EXPERIENCE

Mobile Application Developer, Topia Life Sciences, Vadodara 2023 – Present

- Designed and developed BLE-based Android applications with seamless RESTful API integration.
- Implemented AES-128 CBC encryption and decryption to ensure secure BLE data exchange.
- Published and maintained native Android applications on the Google Play Store.
- Developed responsive UI and integrated custom libraries to enhance functionality and user experience.

Associate Software Engineer, IT Idol Technologies, Valsad 2022 – 2023

- Developed cross-platform Flutter applications with RESTful API integration.
- Integrated payment gateways and implemented user analytics.

Junior Android Developer, MOBIBOX Softech Pvt. Ltd., Valsad 2021 – 2022

- Developed native Android applications using Java and Firebase.
- Worked on Room DB implementation and API integrations.

PROJECTS

FibriArt

- AI-driven ECG monitoring app using BLE-connected wearable sensors for clinical-grade readings.
- Implemented AES-128 CBC encryption and decryption to ensure secure transmission of ECG data.
- Integrated RESTful APIs for real-time data synchronization and backend communication.
- **Technologies:** Android, BLE, AES-128 CBC, RESTful APIs
- **Play Store:** com.fibriart.ecgapp

Bio Hacker

- Lifestyle and health app enabling user registration, custom fitness planning and daily activity tracking.
- Includes community forums, health category selection and progress monitoring features.
- **Technologies:** Flutter, RESTful APIs

Cangurhu

- Multi-role food delivery application with dedicated modules for Customers, Cooks and Couriers.
- Customers place orders, cooks manage preparation and couriers handle real-time delivery updates.
- **Technologies:** Flutter, RESTful APIs

Unikaksha

- E-learning platform offering academic and professional courses with intelligent content recommendations.
- Features include video lectures, course progress tracking, promotional banners and personalized learning paths.
- **Technologies:** Flutter, RESTful APIs

E-Leave System

- Institutional leave management system for students and faculty to submit and track leave applications.
- Admins manage approvals, records and notifications through a Firebase-integrated backend.
- **Technologies:** Android, Firebase
