ABOUT

Experienced Software Tester with 2.5 + years of hands-on expertise in manual and automation testing of web applications in banking domain. Proficient in test case design, defect tracking, regression and UAT testing. Skilled in tools like Selenium WebDriver, TestNG, JIRA and Strong understanding of SDLC, STLC and Agile methodologies. Proven expertise in validating complex banking workflows including payments, loans/CCOD, fund transfers and core banking systems. Adept at collaborating with developers to ensure timely delivery. Committed to delivering bug-free and high-quality software through detailed testing and continuous learning.

Professional Experience

Assistant System Analyst
CEDGE Technologies (TCS - SBI Enterprise) Mumbai

February 2023 – CURRENT

C-Edge is a joint venture between Tata Consultancy Services (TCS) and State Bank of India (SBI). It provides cloud-based, enterprise- grade IT infrastructure and software services specifically to financial institutions and banking entities across India and beyond.

Project : TCS bancs24 (NABARD)
Domain : Banking

Roles & Responsibilities

- **Functional Testing**
 - Participate in test planning, strategy meetings, stand-ups, and retrospectives in an Agile environment.
 - Analyze BRD and functional Specifications, functional requirements, UTP/ impact analysis for banking tickets and modules.
 - Prepare test scenarios, test cases, and test data based on client specifications.
 - Develop or amend automated test scripts using Selenium WebDriver, Java, and TestNG for web banking.
 - Automate regression test suites and smoke tests for major releases.
- **Test Execution**
 - Perform functional, regression, sanity and UAT for banking web applications or tickets.
 - Validate workflows for core banking systems (CBS).
 - Validate backend data using complex SQL queries in putty using linux commands to ensure consistency between UI & database.
 - Perform various deposits, loan and GL jobs for EOD/EOM banking calculations in putty using linux commads and SQL queries
- **Defect Management**
 - Monitor automated test runs and analyze test results for early bug detection.
 - Mail, Identify, log and track defects using TMT(ticket management tool), ITMS, Jira and work with the development team for resolution.
 - Participate in defect triage calls, meetings and conferences to prioritize and retest resolved issues.
 - Generate automation execution reports using TestNG reports.
- **Compliance & Quality**
 - Ensure testing aligns with RBI, NPCI and banking compliance standards.
 - Identify automation opportunities and optimize test scripts for better performance and maintainability.

Skills

Testing Types: Manual Testing, Functional Testing, Regression Testing, **Test Management Tools:** TMT, JIRA, ITMS
Integration Testing, System Testing, UAT, Smoke & Sanity Testing.

Automation Tools: Selenium WebDriver, TestNG, Java (Core Java), Maven, Jenkins, Git

IDE & Utilities: Eclipse, Excel (for tes t data and reporting)

Domain Knowledge: Core Banking Systems (TCS BaNCS)

API & Database: API Testing (Postman), SQL , Backend Data Validation.

Soft Skills: Time Management & Multitasking , Attention to Detail,

Educational Qualification

Bachelor of Engineering in Electrical Engineering- BE

Sardar Vallabhbhai Patel Institute Of Technology – Vadodara, Gujarat - 2020
CGPA – 9.0

Certifications & Courses

- Advanced Manual Testing Course - Quality Software Technology, Pune
- Automation Testing Course - Udemy
