Profile Summary

Seeking job opportunity as Computer Engineer with a progressive organization where I can utilize my technical knowledge and technical skills and contribute to the growth of organization.

Education

B.Tech/B.E., 2024

Sandip Institute of Engineering and Management,
Nashik

12th, 2020

Maharashtra, English

10th, 2018

Maharashtra, English

Key skills

- C
- C++
- Java
- HTML
- CSS
- Javascript
- Bootstrap
- React.js
- Data structure
- OOP
- SQL

Personal Information

City **Nashik**

Country **INDIA**

Hobbies

- Dancing
- Reading
- Travelling

Languages

- English
- Hindi

Internship

6 Months

Food Delivery App

ExelR

During my Full Stack Developer Internship in ExcelR I have worked on frontend, backend and database technologies. I learned HTML, CSS, Javascript, Bootstrap, React.js and many more software developer technologies.

2 Months

Recipe Finder

NerdTech

Developed web applications using HTML, CSS, and JavaScript, with a focus on creating responsive and user-friendly interfaces. Utilized Bootstrap framework to enhance the design and functionality of web pages. Implemented React.js to build interactive and dynamic components, improving the overall performance and user experience of the applications.

Extra curricular

Team leader in academic project

Best coordinator of NSS camp

Coordinator of National level techfight event of year 2023 at college

Under 16 state level Volleyball player in Higher secondary

2 Months

Hospital Management System

Emerging Technologies Software and Automation Solutions

Developed image processing applications using C#.Net and Python during the internship. Contributed to the development of C#.Net and Python libraries for efficient image processing. Collaborated with a team to design and implement a cloud-based image processing platform.

Projects

1 Months

Recipe Finder

Created a Recipe Finder web application using HTML, CSS, JavaScript, Bootstrap, and React.js. The application allows users to search for recipes based on ingredients or keywords, view detailed recipe information, and save favorite recipes for later reference. Leveraged React.js for building reusable components and managing state, while Bootstrap was utilized for responsive design and layout.

4 Months

Breast Cancer Detection using CNN

This project focuses on developing a computer-aided diagnosis system for breast cancer detection using Convolutional Neural Networks (CNNs). By training a CNN model on a dataset of mammogram images, we aim to create a tool that assists radiologists in accurately identifying and diagnosing breast cancer at an early stage. The system will provide fast and reliable predictions, improving diagnostic efficiency and patient outcomes in breast cancer screening.

Certification

- C
- C++
- Java
