MICM Net Solutions Pvt. Ltd.

Dec 2022 - Present

- Developed an educational sprint-based learning platform that helps students and teachers streamline coursework, assignments, and progress tracking.

Project

ERP/Edu Sprint Implementation for Education

- Led/Assisted in the deployment and configuration of Edu Sprint ERP for efficient school management.
- Worked on database management, reporting, School Creation and automation of academic processes.

Integrated features for Module Counseling, student Information, Enquiry, Alumni Management, User Management, Canteen communication.

1. **Module Counseling:** Implemented a structured Counseling system to track student progress, schedule sessions, and manage counsellor assignments.
2. **Student Information System:** Designed a centralized database for storing and managing student details, academic records, and personal information with secure access control.
3. **Enquiry Management:** Developed an automated enquiry-handling system to streamline responses, categorize queries, and maintain interaction history.
4. **Alumni Management:** Created an alumni portal to facilitate communication, event management, and networking opportunities for former students.
5. **User Management:** Implemented role-based authentication and access control to ensure secure user interactions and data protection.
6. **Canteen Communication Module:** Developed a digital interface for managing food orders, tracking transactions, and improving communication between students and canteen staff.
