📍 Valsad, Gujarat

I am a practical knowledge seeker. To work in an environment where my skills and knowledge reflects the growth of the company and enhance my knowledge as well as experience. Web development is a place where we can practically change the world with new possibilities. To make it possible some skills I learnt like HTML, CSS, JavaScript, MySQL, Python, Flask, Php.

Personal Information

Date of Birth:

August 19, 1998

Languages:

Hindi, English

Education

BCA

Swami Vivekanand Subharti University, Meerut

12th

Harsh Chand Inter College, Barhaj, Deoria

10th

Shree Krishna Inter College, Barhaj, Deoria

Certificates

→• **Certificate in Python Programming**

from, Programminghub (Recognized by Google)

→• **Certificate in Web Development**

from, Impulse Technology, Deoria

Skills

Python, Python TkInter, Flask, HTML, CSS, JavaScript, jQuery, Php, MySQL, SEO (Basic)

Projects

→• **Currency Counter(Denomination):** It is a realtime currency counter through which we can count total no. of notes/coins as well as total money combined. It is made for Windows OS.

Technologies used in this project are-

For GUI: Python TkInter

For Logic/Backend Functions: Python, API

→• **Blog Website:** It is a fully responsive blog website in which the 'admin' can post, edit or delete a post.

Technologies used in this project are-

Front End: HTML, CSS, JavaScript, jQuery

Back End: Python Flask, MySQL, json

→• **Personal Website:** In this website I have mentioned my projects, bio and contact details. There is also a contact form through which I can get messages from the visitors on my email id and database at the same time.

Technologies used in this project are-

Front End: HTML, CSS, JavaScript, jQuery

For Logic/Backend Functions: Php, MySQL

→• **Patient Data Management System:** It is a GUI based Windows software which can be helpful in maintaining data of patients visiting to a Hospital, Clinic, Medical Stores etc. We can store and also track that when a patient visited the Hospital or which disease he is suffering from or what medicines are given to him/her by the Doctor. We can track all these information by entering his/her id number which is generated when a new patient registered in the software for first time or we can also track these information with the mobile number given by the patient at the time registration.

Technologies used in this project are-

For GUI: Python TkInter

For Logic/Backend Functions: Python, MySQL

→• **Currency Converter:** We can use this app to convert Rupee to Dollar and Euro, Dollar to Rupee and Euro, Euro to Rupee and Dollar. It has simple UI to do that easily in real time. It can be operated online and offline. If the user is connected to the internet then it will fetch data through API and give realtime value of Rupee to Dollar and Euro, Dollar to Rupee and Euro, Euro to Rupee and Dollar. Otherwise if the user is not connected to the internet then it will show data which is predefined.

Technologies used in this project are-

For GUI: Python TkInter

For Logic/Backend Functions: Python, API

→• **Calculator:** It is a GUI based calculator which can perform calculations of addition, subtraction, multiplication, division, root, square, percentage.

Technologies used in this project are-

For GUI: Python TkInter

For Logic/Backend Functions: Python

→• **Rock Paper Scissors Game:** It is an online game which can be played between user and computer. It can be accessed from [HERE](#)

Technologies used in this project are- HTML, CSS, JavaScript, jQuery

→• **Daily Horoscope App:** This is a web app which can tell your daily horoscope by selecting your zodiac sign.

Technologies used in this project are-

Front End: HTML, CSS, JavaScript, jQuery

Back End: Python Flask, API, json

→• **YouTube Video Downloader:** A web app which has capabilities to download youtube videos in multiple resolutions/quality.

Technologies used in this project are-

Front End: HTML, CSS, JavaScript, jQuery

Back End: Python Flask, API

Interest

Music, Video Games
